

TechLED acquires Ambience Lighting

4th July 2019

Ambience Lighting's William Kirby

(UK) – TechLED has opened up its operational reach to encompass two new avenues of business.

UK-based specialist design and supply company for LED lighting equipment TechLED incorporated Ambience Lighting into its business framework and also launched a hire division for specialist LED lighting products.

TechLED has enjoyed a long-standing business partnership with LED installation specialists, Ambience Lighting, and the move formally incorporates the company to the TechLED fold. The companies have long been allied through a shared commitment to the highest quality LED lighting products and responsive customer service. Ambience Lighting, a trusted and award-winning supplier of LED to the entertainment, hotelier, restaurant, shop-fitting and television industries, will continue to operate under its name.

TechLED's rental division launches with a unique inventory of LED products, which include Luxibel moving heads or architectural floodlights, and Elation weather-proof Pixelbatons. Operating from TechLED's Production Park base in West Yorkshire, the company will provide the facility to hire prestige LED lighting fixtures across the UK, with or without specialist operators.

TechLED Managing Director, Gordon Addison, commented: "I'm delighted TechLED is able to extend these services to our customers. At TechLED, we have the technical and operational experience to get the job done and get it done right first time, using the best products for the job. It's a pleasure to be able to extend that assistance to more of our customers and ultimately to the end user."

Ambience Lighting's William Kirby stated: "We're excited to be working more closely with TechLED. Gordon's technical ability and project management skills are second-to-none. We've worked together over many years and I'm looking forward to this next stage in our history."
